

AUGUST

In Stanley Park

Saturday, August 7

The Stanley Park Young Naturalists' Club

10 am to noon

This month, we will explore Beaver Lake. What can the lake's creatures tell us about the quality of wetland waters? Call 604-718-6522 for more information or to sign up.

Saturday August 7 -- POSTPONED (will be rescheduled)

Celebrating Diversity in Nature

Sunday, August 8

1:30 -3:30 pm

Secrets of Beaver Lake

Beaver Lake has a past! All will be revealed on this walk looking at the plants and organisms on the lake edge. Why are they where they are? What are their special attributes? Do they have a "lifestyle"? Join naturalist Terry Taylor for all the dirt!

Sunday, August 15

1:30-3:30 pm

Insects: Our Friends & Foes

Insects and humans have a complex relationship that stretches into prehistory. We compete and co-operate, and exploit each other's attributes. Join insect expert, Andrew Scott, to find out more on how insects have acted to limit the human population and why the mosquito is the most dangerous animal in Africa.

Sunday, August, 22

10 am to noon

Twenty Million Year of Rock

Join geologist, David Cook, on a walk along the seawall, and explore how 50 to 70 million year old rivers laid the foundation for the Stanley Park we know today. **This walk meets and leaves from the Third Beach Concession Kiosk.*

Sunday, August, 29

1:30-3:30 pm

State of the Park: Ecological Integrity

In the spring of this year, the SPES's Conservation Programs released this groundbreaking report on the condition of the various habitats of Stanley Park. Join Sonya, our Environmental Educator for a tour of areas and concerns highlighted in the report.

All walks leave from the Stanley Park Nature House on Lost Lagoon. Located at the foot of Alberni St, it is below the Viewing Plaza. \$5 members, senior & children; \$10 non-members.
